Bug Details

BUG_001 Drag and Drop does not work with native Actions on some Chrome versions

Bug ID	Module	Severity	Priority	Status
BUG_001	Drag and Drop (TC_018)	Medium	Medium	Open
Steps to Reproduce	1. Navigate to URL 2. Scroll to drag section 3. Locate #draggable and #droppable 4. Execute Actions.dragAndDrop(source, target).perform()			
Expected Result	Element should be dragged to target; target text changes to 'Dropped!'			
Actual Result	Drag starts but element snaps back; target text remains 'Drop here'			
Remarks	Known HTML5 drag-and-drop limitation with Selenium Actions. Workaround: use JavaScript executor or dragAndDropBy offsets.			

BUG_002 Date Picker field clears after sendKeys on some browser zoom levels

Bug ID	Module	Severity	Priority	Status
BUG_002	Date Picker (TC_010)	Low	Low	Resolved
Steps to Reproduce	1. Navigate to URL 2. Locate datepicker input 3. Enter '06/15/2025' 4. Press Tab 5. Read field value			
Expected Result	Date picker displays '06/15/2025'			
Actual Result	Field value appears empty after Tab key on 125% zoom			
Remarks	Resolved by setting browser zoom to 100% via ChromeOptions and using explicit wait before reading value.			

BUG_003 Slider value does not update when using keyboard on Firefox

Bug ID	Module	Severity	Priority	Status
BUG_003	Slider (TC_012)	Low	Low	Open
Steps to Reproduce	1. Navigate to URL on Firefox 2. Scroll to slider 3. Click slider 4. Send ARROW_RIGHT keys 5. Read value attribute			

Expected Result	Slider value increases by the number of arrow key presses
Actual Result	Value attribute does not change on Firefox; slider thumb moves visually but <code>getAttribute('value')</code> stays at default
Remarks	Firefox handles range input events differently. Workaround: use <code>JavascriptExecutor</code> to set value directly.
